We're a Nuclear Family.

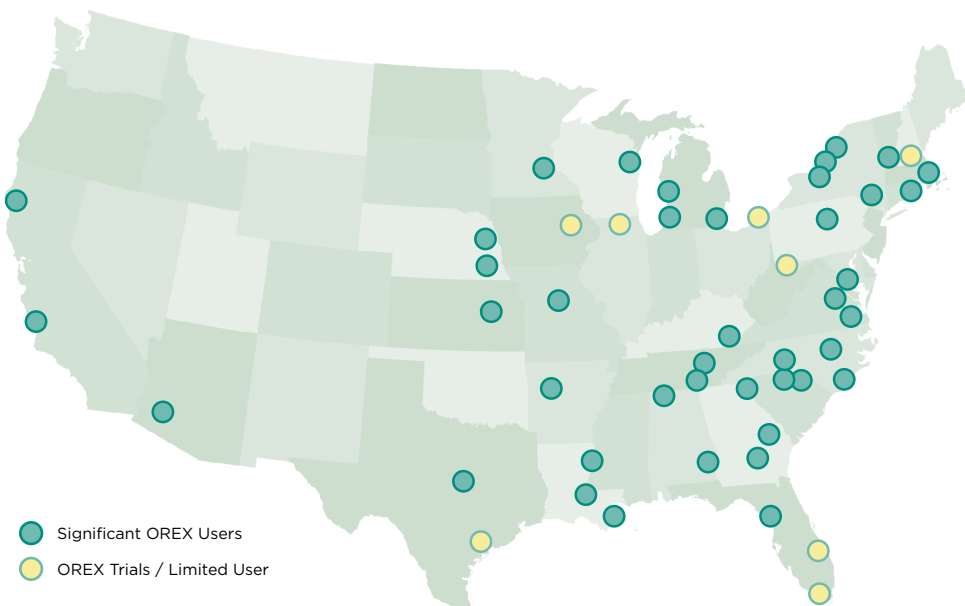

Customers often refer to us as “the OREX guys.” It’s a term of endearment we’re fond of because it captures the casual, personable rapport we have with the facilities that we serve — and the service-focused culture we’ve worked hard to establish.

Our unique culture was born from the long history and deep-rooted relationships our team members have within the nuclear industry. Our company leaders have been Radiation Protection and Radwaste Managers for nuclear power stations in North America. Eastern Technologies, Inc. — the previous company entity from which OREX was created — was a longtime supplier of laundry processing services to the nuclear industry.

To claim that OREX products are “designed by nukes for nukes” would clearly be an understatement. And our family wouldn’t be complete without our valued customers. In fact, customers are often surprised at the level of input they can contribute, both in the ongoing improvement of existing products and in the development of new offerings. We recognize that’s unique among suppliers to the nuclear industry. But that’s just part of being in the OREX family.

THE FACILITIES WE SERVE

More than 40 nuclear stations across the U.S. use OREX products.

Welcome to the latest edition of the OREX catalog! In the pages that follow, you’ll find all the latest in OREX product development and industry-leading technology. Our valued customers know how we love to create good products that work and how we strive to make them better. In fact, the OREX Ultra coverall has established itself as the #1 protective garment of choice across the U.S.; it is truly a remarkable protective clothing product. Not only is there no waste after use, but the OREX Ultra coverall is the only primary garment in the U.S. tested and certified to protect the wearer against radioactive particulate contamination. We continue to be at record production levels with this innovative coverall — a testament to the fantastic job OREX Ultra is doing at many power plants. Simply put, nothing else compares to it. At OREX, we take protection seriously. After all, most of us have been in our customers’ shoes, so we “get it.” We focus intently on providing exactly what the industry needs and supporting your success. And we enjoy continually raising the bar. Experience the future of innovation with OREX. We hope you’ll check us out and let us know what you think.

John Steward, CHP
President and CEO

OREX™ Protective Clothing Application Guide

OREX protective clothing products have proven to be highly effective in a wide variety of nuclear and industrial applications. Like any protective equipment, no single product will work in every situation. So OREX protective clothing is available in a variety of styles and fabric choices to accommodate most of your protective clothing needs and applications. When used as directed, OREX protective clothing offers the highest level of protection and durability, while providing an unmatched degree of comfort. The guide opposite details all of the available OREX protective clothing products and describes which specific applications are suitable for each.

**YOUR OREX REPRESENTATIVE CAN ANSWER ALL YOUR QUESTIONS ABOUT
THE APPROPRIATE OREX SINGLE-USE PRODUCTS FOR YOUR SPECIFIC NEEDS.
PLEASE CALL US AT 334-899-4351 OR VISIT US ONLINE AT OREX.COM.**

OREX ORIGINAL

Our original OREX fabric is used to make a variety of single-use protective clothing products including coveralls, lab coats, booties and headwear. The coveralls come in a double-sleeve arrangement, eliminating the need for tape or glove cuffs. The original OREX fabric is very strong and durable and is highly breathable; approximately 20% more breathable than traditional nylon, cotton, or poly-cotton blend counterparts. In general, original OREX may be worn with confidence in applications where regular untreated nylon, cotton or poly-cotton garments would be worn, and offers equal or better protection as compared to these fabric types. Original OREX fabric is intended for low to moderate contamination levels in dry environments. It is highly absorbent, so is not recommended for wet or potentially wet environments. A single set of original OREX protective coveralls has the same limitations as a single set of nylon, cotton, or poly-cotton coveralls. With any of these garments, you want to avoid kneeling or lying on unprotected contaminated surfaces and you should consider using extra protection when working around tight, cramped areas where contact with contaminated piping and equipment is unavoidable. In summary, original OREX protective clothing products may be viewed as equivalent substitutes for traditional nylon, cotton or poly-cotton Anti-C garments.

OREX DELUXE

When an extra level of protection is needed, Deluxe OREX coveralls, lab coats, hoods and booties offer up to 30 times more protection for dry contamination than those made from original OREX fabric. Deluxe OREX garments are treated with a special coating that also makes them splash resistant. The fabric still breathes remarkably well and provides comfort similar to a standard nylon, cotton, or poly-cotton blend garment. Deluxe OREX coveralls also have a double layer of fabric at the knee for added protection. They are an excellent choice when working in moderately high levels of contamination or in applications where incidental water may be encountered. Although splash resistant, Deluxe OREX is not completely waterproof. It will provide an adequate barrier against accidental splashing, spraying or dripping of small amounts of water, but prolonged exposure to wet conditions or kneeling down in water is not recommended.

OREX ULTRA

The latest addition to our lineup of coveralls is the new OREX Ultra. This garment is made from a new state-of-the-art bilaminate fabric consisting of a soft, non-woven inner layer bonded to a specially engineered OREX film outer layer. OREX Ultra offers a barrier impermeable to particles and is highly resistant to wet contamination. This specially engineered and patented Enviro-stasis™ fabric yields an extremely high water vapor transmission rate which results in unparalleled wearer comfort and a low heat stress index never before achievable in a barrier garment of this type. For situations where high contamination or very fine particle contamination is an issue, the new OREX Ultra is your answer.

OREX XTREME

When working in high contamination or very wet conditions, the new OREX trilaminate fabric offers total barrier protection. OREX Xtreme consists of an outer layer of OREX Deluxe fabric, a middle layer of OREX waterproof film and an inner layer of our soft, original OREX fabric, creating a completely waterproof garment. OREX trilaminate fabric is not as comfortable in terms of breathability as other OREX fabrics, so workers should use it judiciously in applications where heat stress could be an issue. Products available in this new fabric include the OREX Xtreme Coverall, which has waterproof zippers, sealed seams and integral hood and booties; and a two-piece rain suit. Trilaminate shoe covers that can be used as a replacement for the outer rubber-type shoe covers are also available. These products offer the highest level of protection and may be used in any application where plastics or other types of total-barrier garments are normally used.

OREX FR

The OREX FR coverall is made from a specially treated fabric that meets all the requirements of ISO 11611-2007: "Protective Clothing for Welding and Allied Processes." It also meets ASTM F1506, Hazard Risk Category (HRC) 0-2 for Electric Arc Flash Protection. The OREX FR garment is the result of an extensive design and development effort and was subjected to a rigorous series of tests including flame spread, heat transfer and molten metal spatter, making it the only single-use product on the market that is fully tested and certified for welding, cutting and grinding operations. With the addition of the OREX FR coverall, you now have the ability to meet all your protective clothing needs with the complete lineup of OREX single-use products.

COVERALLS

OREX Ultra Coverall

PerCons are now a thing of the past! The OREX Ultra Coverall sets a new standard for daily wear. Made from a revolutionary new Enviro-stasis™ fabric, the OREX Ultra Coverall offers not only unprecedented protection, but comfort and moisture transport properties which exceed those of anything else in the industry today. Call today to get your facility into the Ultra advantage!

This coverall has additional features:

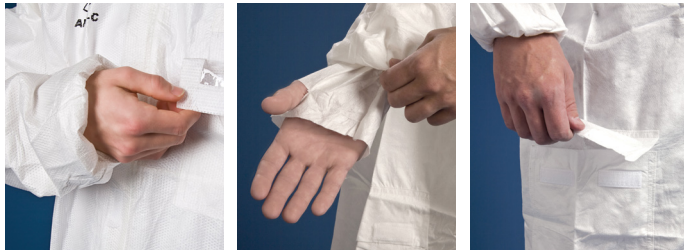

See-through pocket flap with EPD clip strap inside the chest pocket (below left).

Double sleeve arrangement with inner sleeve thumbholes to facilitate dressing and eliminate cuff sealers (below center).

Large cargo pocket on the thigh (below right).

Reinforced crotch seam.

Double reinforced knee areas.

CSA3500 Ultra Coverall

COVERALLS

OREX FR Coverall

Finally, a single-use coverall designed for hot work! The OREX FR Coverall represents a revolutionary breakthrough in single-use product technology. Made from a specially treated OREX fabric, it meets all requirements of ISO 11611-2007 (Protective Clothing for Use in Welding and Allied Processes). It also meets the requirements of ASTM F1506, Hazard Risk Category (HRC) 0-2 for Electric Arc Flash. Heavy duty construction.

CS5000 FR Coverall

Sold in cases of 20

CS5100 FR Hood

One size fits all

Sold in cases of 100

CS5200-XL FR Bootliners X-Large

18" high, Orange OREX FR Fabric

Sold in cases of 50 pairs

OUR CUSTOMERS SAY:

"OREX has dramatically changed the nuclear industry when it comes to protecting workers from contamination. It has radically cut the contamination events at any plant it's gone into. It's also environmentally friendly, so the impact on the environment has been 'green,' I would say."

COVERALLS

OREX Xtreme Coverall

When you need the ultimate in protection, the OREX Xtreme Coverall has you covered! Made from revolutionary trilaminate OREX fabric. Radio frequency sealed seams make this coverall completely waterproof. Double zipper design (shown below), integrated hood and booties ensure you stay dry under the toughest conditions.

CS4301 Xtreme Coverall

Sizes: S - 5XL

Sold in cases of 15

CONTACT YOUR OREX REPRESENTATIVE FOR TECHNICAL SPECIFICATIONS, AVAILABLE INVENTORY AND PRICING AT 334-899-4351, OR EMAIL@OREX.COM.

COVERALLS

OREX Deluxe Coverall

Our popular splash-resistant coverall. Strong and splash-resistant to water and liquids. It has a dosimetry loop and chest pocket, reinforced knees and a tighter weave to ensure better protection when needed. The deluxe coverall still “breathes” as well as a standard untreated cotton coverall. Features “thumbholes” on the inner sleeve (below left) and a large cargo pocket on the right thigh (below right). Cargo pocket has a hook-and-loop closure flap. White.

CS3313 Deluxe Coverall

Sizes: S - 6XL

Sold in cases of 25

DID YOU KNOW?

OREX clothing is known for its light weight and comfort, but it also provides a very high level of protection. The garments are breathable and tend to reduce heat stress. In fact, a full OREX dressout (coverall, booties and hood) weighs 70% less than traditional cloth garments. Since OREX is much lighter, the risk of injury associated with protective clothing handling is reduced. Use of OREX provides numerous other benefits to the plant, including reduced numbers of laundry shipments during outages and cost savings over current laundry programs. What's more, most plants that have converted to OREX have observed significant reductions in personnel contamination events. This can be attributed to the elimination of contamination events that have historically come from the residual particles present in laundered protective clothing.

COVERALLS

OREX Original Coverall

“Original” OREX: still the strongest, most comfortable single-use garment around. Made from our original OREX fabric. Strong, breathable. Dosimetry loop and chest pocket with hook and loop closure. Double-stitched crotch and roomy fit. Features “thumbholes” on the inner sleeve (below left) and a large cargo pocket on the right thigh (below right). Cargo pocket has a hook-and-loop closure flap. White.

CS1304 Double-Sleeve Coverall

Sizes: S - 6XL

Sold in cases of 25

DID YOU KNOW?

All our products are manufactured from a special degradable polymer that is eco-friendly. Following use, products can be treated using a proprietary process that converts the product into a biodegradable organic solution from which the radioactive contaminants can be removed, resulting in significant rad waste volume reduction.

Sold in cases of 80 each

CS2511RM

OREX Ice Vest

Compatible with standard ice packs.

(Ice packs not included.)

CS1900 Ice Vest

One size fits all

Sold in cases of 30

OUR CUSTOMERS SAY:

"OREX is the wave of the future. It's easily disposed of. The volume is reduced to nothing. I send them huge 40-foot trailers of material, and when it's all done, they just have these two small filters of material left. Everything else is dissolved. It's gone. How can you beat that?"

CONTACT YOUR OREX REPRESENTATIVE FOR TECHNICAL SPECIFICATIONS, AVAILABLE INVENTORY AND PRICING AT 334-899-4351, OR EMAIL@OREX.COM.

ACCESSORIES

OREX Utility Apron

Two deep pockets.

CS2300 Utility Apron
